- The 1st server, player #7, for the RED team serves and earns a point. You write the number 1 in the first square next to that player's number.
- Player #7 (still the same server) serves again and earns another point. You write the number 2 in the second square next to that player's number.
- Player #7 serves again and does NOT earn a point for her team. You put a slash in the box next to the number 2 and you then write the number 1 with a circle around it* next to the 1st server of team BLUE's, player #8. Why not player #2, the first player listed, you may wonder? The BLUE team (receiving team) rotates prior to their first serve – this is something that is not done in the earlier grade levels.

*The number 1 with a circle around it indicates that it is a point earned by rally scoring.

- We've included the final two games for you to review. Notice the third game – the 1st server for BLUE, player #6 . . . just as the 3rd-6th Rec leagues are only allowed to earn 3 points while serving, 6th Comp-8th Comp are only allowed to earn 5 points while serving.
- You do NOT count the Rally Point as one of the 5 possible points that can be earned. Once a player has successfully earned 5 points, the service goes to the other team but NO Rally Point is awarded. See RED's player #7. No Rally Point was entered.
- When you're all done, look at the score sheet and finish any of the little things you may have forgotten.
